Full Kit: Receiver Unit, Chair Mat & Transmitter: MED-C365K-WT(X)

Indigo Care provides a pressure sensitive Wireless Chair Sensor Pad that is designed to immediately alert staff when a resident leaves their chair.

The transmitter is an exclusive ID encoded RF Transmitter which communicates with the Wireless Receiver Box (RRU). It allows the Chair sensor mat to wirelessly transmit an alarm to the call point. Simply connect the Transmitter to the chair sensor mat. Then program the Transmitter to the RRU by following the instructions printed. The sensor mat will now trigger the call point when activated within the transmitting area. It is easily integrated to most nurse call systems.

(Note: Transmitter and Bed mat can be ordered separately)
