# Under Mattress Sensor Mat-WIRELESS

**PRODUCT CODES:**      **Bed Mat & Transmitter: MED-NC-B819X-WT**  
**Full Kit: Receiver Unit, Bed Mat & Transmitter: MED-NC-B819K-WT**

Indigo Care provides a pressure sensitive Premium Under Mattress Sensor Mat that is more comfortable and many more advantages. The sensor mats are designed to immediately alert staff should a resident leave their bed which is most useful to residents who are at risk of falling out of their bed, or those who require assistance in arising from the bed.

The transmitter is an exclusive ID encoded RF Transmitter which communicates with the Wireless Receiver Box (RRU). It allows the sensor mat to wirelessly transmit an alarm to the call point. Simply connect the Transmitter to the sensor mat. Then teach in the Transmitter to RRU by following the instructions printed. The sensor mat will now trigger the call point when activated within the transmitting area. It can be integrated to most nurse call systems. (Note: Transmitter and Under Mattress Sensor mat can be ordered separately)

## ADVANTAGES OF UNDER MATTRESS SENSOR MAT

- Away of bodily functions, therefore, more comfort to the user;
- Pressure relief function of mattress is not compromised;
- Reduces infection risk and improve management & handling of infection control;
- No more need to reposition mat multiple times a day;
- Less handling means less breakage

Note: Under Mattress Sensor Mat may not work effectively with all the alternating air mattresses. Please check before purchase.
